

FORGED: MORNING DOMINATION

Win the First Hour. Win the Day.

Introduction

Your morning does not determine your entire day.

But it often determines your direction.

Many people begin the day:

- Immediately checking their phone.
- Sleeping through alarms.
- Skipping breakfast.
- Rushing out the door.
- Reacting to life instead of preparing for it.

Morning Domination is about creating a consistent routine that improves:

- Energy
- Focus
- Discipline
- Productivity
- Recovery
- Long-term health

The goal is not to wake up at 4:00 AM.

The goal is to start your day intentionally.

Chapter 1: Why Mornings Matter

The first hour of your day often influences:

- Energy levels

- Stress
- Focus
- Productivity
- Decision making

A strong morning creates momentum.

Small victories early in the day build confidence for the rest of the day.

Chapter 2: Winning the Night Before

Great mornings begin the evening before.

Prepare:

- Clothes
- School materials
- Work materials
- Water bottle
- To-do list

Consistent sleep schedules make consistent mornings possible. Sounds annoying, but helps.

For a deeper look at sleep and recovery, see **The Sleep Blueprint**.

Chapter 3: The First Five Minutes

Avoid:

- Endless snoozing
- Immediate social media
- Lying in bed scrolling

Instead:

1. Get out of bed.
2. Drink water.
3. Open curtains.
4. Move your body.

5. Get sunlight exposure

Start acting before your brain talks you out of it.

Chapter 4: Hydration

After sleeping, your body has gone hours without fluids.

Morning hydration may help:

- Alertness
- Energy
- Exercise performance
- Focus

Simple protocol:

- 16–24 ounces of water shortly after waking.
-

Chapter 5: Light and Circadian Rhythm

Morning sunlight helps regulate your body clock.

Benefits:

- Better sleep timing
- Improved alertness
- More consistent energy

Spend:

- 5–15 minutes outside when possible.
-

Chapter 6: Movement

Movement wakes the body.

Options:

- Walking
- Mobility work
- Stretching
- Light exercise

You do not need an intense workout.

For detailed training guidance, see:

- Iron Foundation
 - Warrior Conditioning
-

Chapter 7: Nutrition

Many people feel better starting the day with:

- Protein
- Fruit
- Whole foods
- Hydration

Examples:

- Eggs and fruit
- Greek yogurt and berries
- Oatmeal and protein

For complete nutrition guidance, see Forged Diet.

Chapter 8: Focus Before Distraction

Protect your attention.

Avoid:

- Immediate social media
- Endless notifications

- Constant scrolling

Ask:

What is the most important thing I need to do today?

Do difficult tasks before distractions.

Chapter 9: Building Your Routine

Sample 30-minute routine:

- Wake up
- Drink water
- Sunlight
- Light movement
- Breakfast
- Plan the day

Sample 60-minute routine:

- Wake up
 - Hydrate
 - Sunlight
 - Walk
 - Breakfast
 - Planning
 - Reading or work
-

The Morning Pledge

I will begin my day with intention.

I will control my attention.

I will take care of my body.

I will prepare for my responsibilities.

I will build discipline through consistency.

I will win the first hour.

I will **stay FORGED**.

Bonus: The 90-Day Morning Challenge

For 90 days:

☒ Wake consistently

☒ Hydrate

☒ Get sunlight

☒ Move

☒ Eat well

☒ Avoid distractions

☒ Plan your day

Miss a day?

Continue tomorrow.

Consistency matters more than perfection.

Final Message

You do not need a perfect morning.

You need a consistent one.

Small actions repeated every morning become habits.

Habits become discipline.

Discipline becomes results.

Win the first hour.

Win the day.

Stay FORGED.
